

Permanent Protection Through Crack Sealing

Block cracks and gaps for long-lasting pest control results

Why Do Cockroaches Come Back?

- They hide inside small cracks
- They leave their eggs
- In Tile gaps
- In cabinet joints
- In Sink edge
- In wall corners
- in Deep, unreachable spaces

Spray kills what you see, But not what hides inside !

Key Benefits

Long-lasting
protection

Reduces repeat
complaints

Better approach
with spray treatment

Safe & professional
application

Ideal for kitchen &
bathroom gaps

Don't just treat the problem , Seal it permanently.

How It Works

- 1 Inspection of crack & gap areas
- 2 Identification of pest hiding spots
- 3 Professional-grade sealing application
- 4 Complete closure of entry points

Result: No space to hide. No space to enter.

Why Choose Gap Sealing?

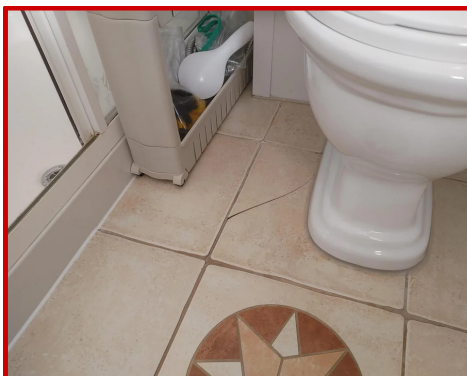

- Prevention-based treatment
- Stops future breeding
- Reduces dependency on frequent sprays
- Clean & neat finish
- Safe for residential & commercial spaces

Ideal For :

Kitchens

Bathrooms

Cabinets
